Professional Summary

DevOps Engineer with 2+ years of experience in CI/CD automation, containerization, and cloud operations. Strong hands-on expertise in Jenkins, Docker, Terraform, and Bash scripting, with solid experience in production support and incident management. Proven ability to improve deployment reliability, automate infrastructure tasks, and support high-availability production systems.

Professional Experience

Flipkart — Bengaluru, India

DevOps Engineer

Feb 2024 – Present

- Designed and maintained Jenkins and GitHub Actions CI/CD pipelines, reducing deployment time by 60%
- Optimized pipeline stages and build processes, reducing build failures by 40%
- Containerized applications using Docker and automated build and deployment workflows
- Implemented multi-stage Docker builds, reducing image size by 40%
- Automated infrastructure and environment setup using Terraform to ensure consistent deployments
- Implemented monitoring dashboards and alerts using Grafana, improving incident response time
- Collaborated with development and QA teams to validate releases and manage production rollouts

Production Support Engineer

Aug 2023 – Feb 2024

- Monitored and supported production systems, ensuring 99.9% application availability
- Handled L1/L2 production incidents including P1/P2 issues within SLA timelines
- Performed Linux system administration and troubleshooting for application and infrastructure issues
- Analyzed logs and metrics to identify root causes and prevent recurring incidents
- Created runbooks and operational documentation to improve incident resolution efficiency

Projects

CI/CD Automation Projects (IFMS, Liqudice, Pacman)

- Built end-to-end CI/CD pipelines enabling automated builds and deployments within 2–3 minutes
- Implemented zero-downtime deployment workflows with rollback support
- Optimized pipeline caching and stages, reducing overall deployment time by 40%

Technical Skills

Cloud Platforms: Azure, AWS (Basic)

CI/CD Tools: Jenkins, GitHub Actions

Containerization: Docker

Infrastructure as Code: Terraform

Programming & Scripting: Python, Bash

Version Control: Git, GitHub

Monitoring & Operations: Grafana, Crontab, Incident Management

Operating Systems: Linux

Certifications

AWS Certified Cloud Practitioner (2022)
